

StripTec 6W IP20 24V 2835 LED Strip Light

Product Code: ST-2835-6W-24V-IP20

PRODUCT OVERVIEW

Introduce highly efficient, cost-effective ambient lighting into architectural interiors with the StripTec 6W IP20 24V 2835 LED Strip Light. Engineered utilizing precision-binned SMD 2835 chips, this flexible tape profile serves as the standard choice for secondary backlighting, ambient drop coves, under-cabinet shadows, and intricate joinery detailing.

Operating on a regulated 24V DC circuit, the tape design significantly curtails voltage drop over longer straight runs compared to conventional 12V legacy equivalents. Featuring an ultra-slim, low-profile flexible copper backing board, it drops perfectly into standard aluminum channels to achieve clean, premium linear distribution across residential or hospitality builds.

TECHNICAL SPECIFICATIONS

PARAMETER	SPECIFICATION DETAIL
Operating Voltage	24V DC Constant Voltage
Power Consumption	6W per linear metre
Chip Type	Premium SMD 2835 Array
IP Rating	IP20 (Indoor)
Cutting Increment	100mm
Warranty	5-Year Corporate Warranty
