BESPOKE LED STRIP SEE THE LIGHT!

StripTec IP20 24V RGBW LED Strip Light (17W)

PRODUCT CODE: ST-RGBW-17W-24V-IP20

PRODUCT OVERVIEW

Introduce dynamic multi-colour customization alongside dedicated white lighting into architectural interiors with the StripTec IP20 24V RGBW LED Strip Light. Engineered utilizing a premium 4-in-1 chip array combining Red, Green, Blue, and Warm/Cool White elements onto a single package, this premium flexible tape delivers seamless colour mixing alongside high-quality practical ambient lighting. Operating on a high-output 17W per linear metre circuit, it serves as the ultimate professional choice for vibrant entertainment venues, creative feature walls, premium drop coves, and structural architectural installations. The heavy-duty 24V DC backing design ensures excellent current distribution and reduced voltage drop across longer uninterrupted lengths.

OPERATING VOLTAGE	24V DC Constant Voltage
POWER CONSUMPTION	17W per linear metre
CHIP TYPE / IP RATING	Premium 4-in-1 SMD RGBW Array / IP20 (Indoor)
CUTTING INCREMENT	100mm
WARRANTY	5-Year Corporate Warranty

INSTALLATION & SAFE USAGE

- Always isolate the mains power supply completely prior to executing cuts, connections, or control gear configuration.
- Ensure the mounting channel or surface is clean, dry, and entirely free of grease before pressing down the 3M adhesive backing.
- Only split or cut the LED strip at the explicitly marked copper solder pad intervals spaced every 100mm.
- Connect using an appropriate 4-channel RGBW controller and a regulated constant voltage 24V DC LED driver matching the load.
