

Strip Tec UK – Plaster-In Wall Washer LED Aluminium Profile

The **Strip Tec UK Plaster-In Wall Washer LED Aluminium Profile** is a premium recessed lighting solution designed for plastered walls and ceilings. Once installed and plastered over, only the smooth light output remains visible, creating a modern and minimalist lighting effect. With approximate dimensions of **18mm x 96mm**, this profile provides a broad wash of light ideal for both residential and commercial interiors. Crafted from **anodised aluminium** with a **PC diffuser**, it delivers durability, efficient heat dissipation, and evenly diffused illumination. Perfect for feature walls, hallways, and ceilings, it offers a seamless finish that blends effortlessly into any space. Compatible with LED strips up to **12mm wide**, this channel supports various colour temperatures for custom lighting effects. Choose **Strip Tec UK** for precision-engineered LED profiles designed to elevate every lighting project.
