Product Overview

Experience the next level of lighting with our RGB IC LED Strip Kit. Unlike standard RGB, the IC (Integrated Circuit) chips allow for 'Dream Color' effects—multiple colors chasing, flowing, and strobing simultaneously on a single strip. This complete 10m kit is designed for easy 'plug and play' installation, ideal for accentuating architectural features, gaming rooms, and commercial indoor displays.

Key Features

- **Integrated Circuits (IC):** Control segments individually for chasing effects.
- **Plug & Play:** Includes power supply and controller.
- **Versatile Control:** IR remote included with optional
- **High Quality LEDs:** Consistent brightness and color across the 10m run.
- **Easy Installation:** Strong 3M adhesive backing for secure mounting.
