Technical Product Sheet

DC 2m Extension Male to Female Lead

Easily extend the reach of your power supply. Take the hassle out of your lighting installation with our high-quality 2-meter DC extension lead. Designed for versatility and convenience, this cable allows you to bridge the gap between your power supply and your LED lighting setup, ensuring you can place your power source exactly where it needs to be.

Why choose our DC Extension Lead?

When planning your LED project, fixed cable lengths can often limit your design choices. This extension lead is the perfect solution for overcoming those distance limitations, allowing for a cleaner, more professional finish to your installation.

Technical Specifications

Cable Length: 2 Metres

Connector Type: 2.1mm DC Barrel (Male to Female)

Application: Ideal for extending the output cable of LED power supplies, controllers, and accessories.
